Flute instruction

Flute students will receive professional instruction that is based on positive motivation and enjoyment. It is very important to me to support each student individually and encourage him or her at the level the student is on to the best of my ability. The subject matter of my lessons include all basic musical fundamentals such as reading music, rhythm, phrasing, musical expression, production of a sound using the french embouchure, major and minor scales, ensemble playing etc. The lessons are to be seen as a complete unit, so these different components may be brought into the instruction as necessary. A highlight and incentive each schoolyear are my special concerts that students can be a part of.
